

Built-in PC system fitted with the latest gen water cooled CPU and Nvidia or AMD GPU.

GT based fibergalss seat shown with our 'V3 Base System' which features built-in PC system, and UD Audio Speakers Wind Simulation Multi-Dimensional 8 zone Tactile Feedback system and GT based fibergalss seat shown with our 'V3 Base System' which features built-in PC system, HD Audio, Speakers, Wind Simulation, Multi-Dimensional 8 zone Tactile Feedback system and fully VB compliant. Our baces can be fitted with Mability antice. (lockable wheels) for each of the compliant. D Audio, Speakers, Wind Simulation, Multi-Dimensional 8 zone Tactile Feedback system and fully VR compliant. Our bases can be fitted with Mobility option (lockable wheels) for ease of transportation and rapid to deployment. transportation and rapid re-deployment.

Now available with enhanced pedal support system allowing the same adjustability as a seat slider, but for pedals. An additional 4 level pitch adjustment allows

Our base system V3 is engineered to provide a wealth of features while Our base system vs is engineered to provide a wearin or leatures while completely eliminating ALL of the cabling and external hardware such as completely eliminating ALL of the cabiling and external hardware such as external PC, controllers, power supply, sound amplifiers and peripherals. All in a sleek and ergonimically functional system which can be sieek and ergonimically functional system which carried custom painted to any colour and finish of your chosing.

## DRIVER STEERING & PEDAL SYSTEM FOR GT & FORMULA

Made of aircraft grade aluminium and 304 grade stainless steel.

Hydraulic, pressure sensitive, fully adjustable, 12 bit resolution professional pedals. (shown with optional clutch pedal).

Pro 15 - Direct Drive steering motor provides high fidelity feedback at 15Nm sustained torque, ideal for GT/Touring. Or the SC Pro with 25Nm, at 15Nm sustained torque, Karting applications. Fitted with Motorsport QR ideal for Formula /LMP or Karting applications with all our steering wheels mount compatible with all our steering wheels

Formula Steering wheel, features magnetic actuated carbon fiber paddle shifters with ffully programmable knobs and buttons.

Generic 320mm GT wheel + adjustable carbon paddle shifters + 12 programmable buttons + heavy duty Motorsport QR + coiled USB.

## DRIVER FEEDBACK & DISPLAY OPTIONS

55" Curved LED screen mobile stand supports single or triple displays (up to 50"), or a single Ultra-wdie 49" version.

Both support our optional mobilty function.

HTC, Oculus, HP or Valve VR provides an immersive and realistic driving experience available with realtime head tracking and audio headphone system.

With up to 8 transducers (upgradeable from stage 1 to stage 3) allowing additional feel for wheel lockup, Stage 5) allowing additional feet for wheel lockup,
ABS, enhanced understeer/oversteer and transmission feedback (ideal for GT, Rally or Drift setups).

## FORMULA / LMP SIMULATOR SYSTEM OVERVIEW

Now available with enhanced pedal support system allowing the same adjustability as a seat slider, but for the pedals. An additional 4 level pitch adjustment allows full pedal height adjustment.

Formula based Simulator chassis shown with our 'V2 Base System' which features built-in PC every HD Audio. Multi Dimensional 9 7000 Tactile Feedback every and fully VB compliant. Formula based Simulator chassis shown with our 'V2 Base System' which features built-in PC system, HD Audio, Multi-Dimensional 8 zone Tactile Feedback system and fully VR compliant.

Our bases can be fitted with Mind Simulation our Mebility entire deckable wheels for each of the complete system. stem, FID Audio, Multi-Dimensional 8 zone Tactile Feedback system and fully VR compliant.

Our bases can be fitted with Wind Simulation, our Mobility option (lockable wheels for ease our bases can be fitted with Wind Simulation, our Mobility option (lockable wheels for ease our bases can be fitted with Wind Simulation, our Mobility option (lockable wheels for ease our bases can be fitted with Wind Simulation, our Mobility option (lockable wheels for ease our bases can be fitted with Wind Simulation, our Mobility option (lockable wheels for ease our bases). Our bases can be fitted with Wind Simulation, our Mobility option (lockable wheels for ease of transportation and rapid re-deployment. All in a sleek and ergonimically functional system of transportation and rapid re-deployment. eployment. All in a sleek and ergonimically functional system which can be custom painted and fin ished to your branding.
